

September 12, 2008.

To: the Residents and Property Owners of Kensington Ave., Evelyn Ave. and Clarence Ave.

Contract 1 - 2008

Kensington Ave. Sanitary Sewer and Watermain Replacement, Evelyn Ave. Sanitary Sewer Replacement and Clarence Ave. Watermain Replacement and Road Reinstatements

The above project is nearing completion and there have been some changes to the type of restoration to be employed. The roads will be reinstated using recycled asphalt from the Town's supply. All asphalt driveways will be replaced with a sacrificial layer of asphalt. Any asphalt curbing that was in place prior to the construction will be replaced.

The Town intends to complete the reconstruction of the streets in the spring of 2009. With that in mind the recycled asphalt roads will require maintenance from now until the reconstruction commences. Should potholes occur we ask that you contact our office as soon as possible in order that for us to make repairs.

Lawns will be topsoiled and sodded. The contractor is responsible for the first thirty (30) days of watering after that we would ask if you would water the sod on a regular basis to ensure proper growth.

Please feel free to call our office if you have any questions. Our number is 519-485-0120.

E. R. (Gene) McLaren, C. E. T.
